Among these were Justice Dowling, Exsenator Morgan Jones, Warden Stacom, of the City Prison, Capts. Kennedy, Walsh and Kelso, of the Police Department, and like this, and unsuitable as wain to at everal other gentlemen. Mr. Jourdan was born in this city, Jan. 3, 1831 of Irish parentage. He derived as education in the common schools of New York, though his parents' circumstances compe<sup>11</sup>ed him to begin life early on his own account. Being a down-town

resident, he icl into irregular employment in the morning paper offices as a folder, and finally became regularly engaged in the *Tribune* mail-room, proving se good a workman that he ultimately rose to the position of foreman. He was in charge of the mail department of the paper for several years, until May 11, 1853, when at the age of twenty-two he suddenly resigned, and entered the police department

always ready and eager to take up a case, no matter how hopeless, and his detective acomen was of such a high order that he rarely failed to clear the most reversious or puzzling case. He became so well acquainted with the criminal classes of this and other cities of the Union that it seemed easy for him to pick out the man who had committed the offense given him to investigate. Burglars a dother desperate thieves came to lear him, and many of them owe to his efforts long terms in the various State prisons in the country.

The country is an enterial active reflections:

"First—All this material achievement is great and grand to us, because it is the revelation of the power of human thought; for all art is science applied, and every material triumph is an embodiment of the thought of thinking souls. The world of mechanical skill is witness to the victory of man's soul over the brute forces and outposts recklessly at night. Depend upon it this will lead to revelation of the power of human thought; for all art is science applied, and every masse, and fire on the pressure and outposts recklessly at night. Merchants and others found him them owe to his efforts long terms in the various State prisons in the country.

He always paid carnest attention to murder cases, and I to no stone unturned to seen a the criminal and in nearly every "And, second—Modern civilization and the work of its manufacturing skill is no second where the homicidal crime was in Breesting the calprit. He was constantly catching some thief or burglar who had broken over in some other precinct, frequen ly having the offender and his plunder before his neighboring Cuptain even knew that the crime had

oeen committed. In important robberies, where the amount of the property was very large, Mr. Jourdan invariably distinguished himself. In 1866 he recovered \$204,000 in money and bonds, that had been stolen from the St. Niebolas Hotel. In 1867 he directed the operations of five well-known detectives through five months' search af-ter the Concord, N. H., Bank robbers, and finally succeeded in arresting the prime mover in that celebrated burglary, besides recovering \$310,000 of the sten bonds and securities. He was also energetic in working up, with Captain Irving, of the Headquarters Detective Squad, the famous Lord bond robbery, where nearly \$3,000, 000 were carried off, and he was mainly approach. instrumental in recovering \$135,000 worth of the plunder. He and others recovered \$80,000 in bonds that had been olen from the Royal Insurance, and \$00,-000 for the Mechanics' Insurance Company, of New rk. In 1868 he worked up the Bowdomham Me, Bank robbery, and re-

Downsian Me., Dank roosery, and re-covered \$75,000.

During his career as a police officer, he was remarkable for the clusters with which he prepared his cases, and so effectually paved the way for the District Attorneys that very few of his prisoners escaped conviction. As Captain, he was a strict disciplinarian and impartial superior. He always displayed great execu-tive ability in the conduct of his precinct, being always careful to confine himself within the strict letter of the law in the erformance of police duties. Estruest in he discharge of his own duties, he always racted strict attention and discipline from his subordinates, though his general dis-position and readiness to appreciate faith-ful performance of duty made him a favorite with his men, and created for him a host of friends in all classes of society. When the present system of Police was perfected, Mr. Jourdon, came naturally into the great work as an available candi-

date for the position of Superintendent, vacated by Mr. Kennedy's resignation, and he was duly appointed to that arduous and responsible post by an unanimous vote of the Bard. His record as Chief Executive of the department is an excel-lent one, though his ambition to repress existing evils in the department led him to overtask his strength, and the occurous crime Mr. Jourdan scarcely slept or rested, in his extraordinary efforts to secure an elucidation of the mystery that yet surrounds that assassination. This, JOHN KELLOGG'S dded to the great strain on his mental culties, brought on a severe prestration, and he was compelled to desist and place himself under the care of physicians Even then he persisted in keeping cogni-zance of the business of the department, failed to leave his house for his office-chair. In his death the Department will lose a valuable executive head, who cannot be easily replaced.

French Admit Defeat. ORLEANS, Oct. 10.

The Commandant-in-Chief of the Fif-teenth Army Corps sends the following report to the Minister of War at Tours: About 9 o'clock this morning, at Artenay, where there was a brigade of Sergnelle and several companies of Chasseurs, we were attacked by a considerable force of the enemy, who succeeded in occupying the place. Gen. Regan went to the assistthe place. Gen. Regain went the assistance of the French forces with five regiments and four battalions, and also a battery of eight guns. After combatting until three o'clock this p. m., our troops were repulsed into the forest, which I retain, and shall defend at any price. The Prussians outnumbered us. London, Oct. 11.

A correspondent of the Telegraph says the Prussians on leaving Muhlhouse fired on the people, killing and wounding several.

TITURVILLE, Pa., September 21, 1870.

A. R. WILLIAMS, Esq., Titurville, Pa.—Dear Sir: We take pleasure in adding our names to the long roll of testimonnals already given in advocacy of the merits of the Improved Double-Rabbel Furnace Grates. Rabbed Furnace Grates.

We have had them in constant use for a year, and during that time (all hough our jurnace represent more than five hundred feet of surface we have not yet lost a single bar by burning out or warving. Their advantages to us, in economizing fuel, case of management and superior durability, warrant us in recommending them as fully up, if not superior, to the merits claimed for them. We would use no other. Truly yours, would use no other. B. E. MORELAND & CO.

IMPORTANT TO ALL.

The Earth Closet is a perfect substitute for the WAT: B CLOSET. It may be used in any room, or no be substituted for the COMMON PRIVY.

It is fnodorous, Cheap and Simple

The following letter to the Buffalcagents of the

The following letter to the Buffalcagents of the Earth-Lloset Company was written by the Hev. A. H. Lewis, of Alfred Centre, New York, under date of May 3, 1870;

"I have Earth-Closet fixtures of the 'Pull-up' nattern, put up in the form of a permanent commode over a simple box which holds about one barrel, and can be emptied with a shovel whenever it is desired. The expense, beyond the cost of fixtures, was about one day's work by a carpenter, and the little lumber needed—tuck less than even an out-door closet of the old offensive style.

style.

"It has been in constant use since November last by a family of four or five persons, the coal burned by the family furnishing all the earth re-

burned by the family furnishing all the earth required.

"The results may be suramed up as follows:

"About one barrel per mouth of superior fertilizing material. 2—The absence of all inconvenience from snow, wet, or exposure of any kind incident to an out-door closet, and of all defanive adoes incident to the ordinary 'water-closet."

"In short, after a trial of six or seven months, I can beartily recommend the 'Dry-Earth System' as being the chaptest, most effective, most convenient, and healthiest method with which I am acquainted. I would not exchange my commods for a water-closet gratis, and an aut-door privy is not to be mentioned."
